About me

Recent Computer Engineering graduate with a strong ability to think analytically and solve problems efficiently. Quick to grasp new concepts and apply them in practice, with a collaborative and adaptable approach to teamwork. Motivated to apply technical knowledge and a results-driven approach in a professional environment.

Education & Training

Bachelor of Science in Computer Engineering 01/09/2021 – 17/07/2026

University of Turkish Aeronautical Association | Ankara, Türkiye

Core competencies in computer engineering, including programming, data structures and algorithms, object-oriented programming, programming languages, database systems, operating systems, computer architecture, microprocessors, digital/logic design, computer networks and software engineering. Additional specialization in artificial intelligence, digital image processing, cryptography, statistical computing, parallel and distributed computing, cloud computing, Internet of Things (IoT), quantum information and computing, with experience in senior design projects and engineering/technical communication.

Level in EQF: 6

Work experience

Intern 01/07/2024 – 01/08/2024

Energy Market Regulatory Authority (EMRA) | Ankara, Türkiye

Network / IT

- Designed, deployed, and managed virtual machines in a virtualized environment.
- Configured network communication between virtual machines, ensuring proper connectivity and data flow.
- Installed and configured server systems to support network operations.
- Assigned and integrated client computers to the server, enabling centralized communication and management.
- Performed server administration tasks, including user account management.
- Defined and enforced password policies and security restrictions for users.

Intern 01/08/2024 – 01/09/2024

Information and Communication Technologies Authority (ICTA) | Ankara, Türkiye

Software Development (Python)

- Developed a command-line based To-Do List application using Python.
- Implemented task management functionalities, including creating, updating, deleting, and listing tasks.
- Designed features to mark tasks as completed or pending.
- Enabled task prioritization and organization for efficient workflow management.
- Utilized structured data handling to store and manage task information.
- Focused on clean, readable, and maintainable code following basic software development best practices.

Intern 01/06/2025 – 01/08/2025

Arca Software Information Consulting Training | Ankara, Türkiye

Web Development / AI Integration

- Developed a local web-based news aggregation application.
- Implemented keyword-based and time-filtered news search functionality.

★ Skills

- Python (computer programming)
- Java (computer programming)
- React, Next.js, React Native
- TypeScript
- FastAPI
- Git
- MySQL
- SQLite

🌐 Language Skills

- **Turkish:** Mother tongue
- **English**
 - Listening: B1
 - Reading: B1
 - Spoken production: B1
 - Spoken interaction: B1
 - Writing: B1

- Displayed news articles with images and direct links to original sources.
- Integrated an AI-powered news summarization feature using the Hugging Face API.
- Enabled users to generate short summaries on demand via a button-based interaction.
- Implemented search history tracking with options for users to view and delete past searches.
- Designed a category-based news browsing system with multiple main categories (e.g., Sports, Politics, Entertainment).
- Retrieved and displayed latest news dynamically based on selected categories.
